INTERESTS Autonomous Driving, Reinforcement Learning, Lidar 3-D Detection, Computer Vision, Driving Behavior, Traffic-Flow Modeling and Simulation, Traffic Signal Control

EDUCATION **University of Washington, Seattle, US**

- **Ph.D. Candidate in Intelligent Transportation System** Sep 2018 – Present
 - Advisor: Prof. Yinhai Wang, professor in CEE, adjunct professor in ECE
 - Focus: Intelligent Transportation, Driving Behavior, Autonomous Driving, 3D Detection, Deep Reinforcement Learning
 - Core Courses: CSE 546 Machine Learning, CSE 571 Robotics (4.0/4.0), CSE 573 Artificial Intelligence, CSE 576 Computer Vision (4.0/4.0), CSE 547 Machine Learning for Big Data
 - Cumulative GPA: 3.86/4.0

Tongji University, Shanghai, China

- **MEng in Communication and Transportation Engineering** Sep 2015 – Jun 2018
 - Thesis: Car-Following Behavior Modeling and Its Application in Intelligent Driving
 - Focus: Autonomous driving, reinforcement learning, car-following behavior, and naturalistic driving study
 - Cumulative GPA: 91.2 / 100; Integrated Ranking: 1 / 237
 - Core Courses: Machine Learning, Fundamentals of Software Techniques, Transport Data Analysis, Fundamental of Traffic Flow Theory and Micro Simulation Analysis, Traffic Safety Analysis and Experiment
 - Online Courses: Deep Reinforcement Learning (Berkeley EECS), Deep Learning for Self-Driving Cars (MIT EECS)
- **BEng in Traffic Engineering** Sep 2011 – Jun 2015
 - Thesis: Evaluating Advanced Driving Assistance System Based on Naturalistic Driving Data
 - Cumulative GPA: 91.62 / 100; Integrated Ranking: 1 / 205
 - Math Courses: Advanced Mathematics, Linear Algebra, Probability and Mathematical Statistics, Operation Research, Numerical Methods and Computer Algorithms, An Introduction to Matlab and Its Application in Engineering
 - Computer Courses: C/C++ Programming, Database Technology and Applications, Fundamentals of Computers, Mobile Computing Introduction, Operating System, Computer Vision
 - Professional Courses: Statistical Analysis in Transportation Engineering, Theory of Transportation System, Traffic Information Engineering, Traffic Management and Control, Traffic Safety Engineering, Transportation Planning

Coursera, Mountain View, US

- **Deep Learning Specialization, deeplearning.ai** Dec 2018
 - Neural Networks and Deep Learning
 - Improving Deep Neural Networks: Hyperparameter tuning, Regularization and Optimization
 - Structuring Machine Learning Projects
 - Convolutional Neural Networks
 - Sequence Models

**RESEARCH
EXPERIENCE**

Signal Timing Control for Large-Scale Networked Intersections Jun 2019 – Present

- **Oak Ridge National Laboratory, Oak Ridge Institute for Science and Education (ORISE)**
 - Advisor: Hong Wang
 - Proposed two new multi-input and multi-output (MIMO) traffic signal control methods that can improve network-wide traffic operations in terms of delay and energy consumption.
 - A 35-intersection network of Bellevue, WA, is used as the basis for the development of the algorithm, where modeling and intersection controls in a globalized setting are established using MIMO linear control theory and high matrix formulation.
 - The proposed control methods were evaluated in a microscopic traffic simulation environment, VISSIM. Simulation results show that the proposed methods have much shorter average travel delays in the network when compared with the delays of conventional pretimed and actuated controls.

Shanghai Naturalistic Driving Study Data Analyses

Apr 2015 – Jun 2018

- **General Motors, Active Safety Advance Development Department**
 - Collected 60 Chinese drivers' real-world driving data, with a total mileage of 161,055 km.
 - Investigated decision-making mechanisms for essential driving behaviors based on 108,933 car-following events, 17,309 lane-change events, 7,845 cut-in events, and 3,256 vehicle-pedestrian conflicts.

- Calibrated, validated, and cross-compared five representative car-following models and found that the full velocity difference model performed best for Shanghai drivers.
- Investigated the impact of a forward collision warning system on drivers' car following behavior.
- Developed two autonomous car-following algorithms with deep reinforcement learning: one can perform human-like car following; the other is capable of controlling vehicle velocity in a safe, efficient, and comfortable manner.

Optimized Road Alignment Design Using Advanced Driving Simulator

Sep 2014 – Jun 2018

- Chinese National Science Foundation with Grant No. 51522810
 - Evaluating the safety performance of combined horizontal and vertical alignments in mountainous freeways, to guide the design of safer mountainous freeways.
 - Replicated the full range of combined alignments used on a mountainous freeway in China using Tongji University driving simulator.
 - Investigated the effects of combined alignment on lateral acceleration, lane offset, and speed variation.

Driving Behavior Research for Intelligent Collision Avoidance Technology

Dec 2011 – Dec 2015

- China First Automobile Work (FAW) Corporation
 - Examined the effects of situational urgency on drivers' collision avoidance behaviors using Tongji University's eight-degree-of-freedom driving simulator.
 - Developed a kinematic-based forward collision warning (FCW) algorithm that is compatible with drivers' risk perceptions and behavioral responses.
 - Implemented the proposed FCW algorithm in Tongji University driving simulator, and evaluated the system's performance, warning timing, and safety benefits.

Patents

- [1] X. Wang, **M. Zhu**, and M. Chen, “A forward collision warning algorithm considering heterogeneity of drivers’ reaction,” *C.N. Patent 105691391 A*, filed Jun 2016, and issued Sep 2017.

AWARDS & SCHOLARSHIPS

- Outstanding Graduates of Shanghai, Shanghai Education Commission Mar 2018
Top 5%, for outstanding graduate students in Shanghai.
- National Graduate Scholarship (twice), Ministry of Education, China Oct 2017, Oct 2016
Top 0.2%, for outstanding graduate students in China.
- Outstanding Student Award, Tongji University Oct 2016
One of 44 awardees from the 13,864 graduate students in Tongji.
- China Post-Graduate Mathematical Contest in Modeling, Second Prize Sep 2016
- Volvo Group Scholarship, Volvo Group Dec 2014
One of 15 awardees in China, for outstanding engineering students.
- National Competition of Transport Science and Technology for Students, Second Prize May 2014
One of 8 winning groups in China.
Project: Traffic Parameter Analysis Platform based on Unmanned Aerial Vehicle (UAV).
- Mathematical Contest in Modeling, Honorable Mention Jan 2014
Paper: Modeling the Keep-Right-Except-To-Pass Rule Using Cellular Automaton
- National Endeavor Fellowship (twice), Ministry of Education, China Nov 2013, Nov 2012
Top 3% of all the undergraduate students in China.
- China Undergraduate Mathematical Contest in Modeling, Second Prize Sep 2013
Top 5% among over 30,000 competition teams in China.

VOLUNTEER & TEACHING

- The 5th International Symposium on Transportation Safety**, Tongji University, China Sep 2017
 - Picked up 13 international symposium attendees at the airport.
 - Prepared the invitation letters, and was in charge of the symposium registration.
- Transportation Safety Discipline “111 Project” Base**, Tongji University, China Sep 2016
 - Translated resumes for 21 invited international experts and prepared the presentation files.
- Statistical Analysis in Transportation Engineering**, Teaching Assistant, Tongji University Fall 2017
 - Preparing course slides and tutoring students on SAS coding.

WORK EXPERIENCE

- Cloud Base Information Corporation**, Shanghai, China Sep 2014 – Nov 2014
 - Intern, Department of Data Science
 - Project: Traffic State Estimation Based on Mobile Phone Signaling Data.
 - Real-time estimation of traveling speed, traveling time and traffic congestion state.

PROFESSIONAL ACTIVITIES

- IEEE Transactions on Intelligent Vehicles**, IEEE 2019
 - Reviewer
- Accident Analysis & Prevention**, Elsevier 2017, 2018
 - Reviewer
- Connected & Autonomous Vehicles (CAV) Impacts Committee**, ASCE Transportation & Development Institute (T&DI) Sep 2019 – Present
 - Younger Committee Member
